Analytical reasoning questions and answers with explanation

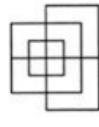

Find the minimum number of straight lines required to make the given figure.

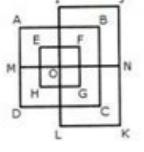

Reasoning

One of the important topic in Bank Po's is nonverbal analytical reasoning. Now we will discuss some examples.

- Find the minimum number of straight lines required to make the given figure.

The figure may be labeled as shown.

The horizontal lines are L1, AB, EF, MN, HG, DC and LK i.e. 7 in number.

The vertical lines are AD, EH, IL, FG, BC and JK i.e. 6 in number.

Analytical Reasoning

Generally 3 to 5 questions are covered from this topic. Here some previous questions are there.

Directions (1 to 5): Study the following information carefully and answer the given questions. (Corporation Bank PO 2011)

One of the Seven subjects Viz. Maths, Zoology, Botany, Chemistry, Physics, English and Statistics is taught on one day in a week starting from Monday and ending on Sunday. Chemistry is taught on Thursday. English is taught the day immediately next to the day when Zoology is taught. English is neither taught on Tuesday nor Saturday. Only one lecture is held between Chemistry and Botany. Two Lectures are scheduled between Maths and Zoology. Statistics is neither taught on Monday nor Sunday.

- On which of the following days is Physics taught?

- (a) Monday (b) Tuesday
(c) Wednesday (d) Thursday
(e) Friday

- How many subjects are taught between Botany and Zoology?

40

Test No 3

Question No 1 - 5

At the start of a two-week hiking trip, eight girls—Fozia, Hina, Juwaria, Kiran, Milaka, Samina, Tamina, and Raheela—will divide into a Lake Group and a Mountain Group of four members each. After following different trails for one week, the groups will meet and the girls will again divide into a Lake Group and a Mountain Group of four members each, which will again follow different trails for the second week. There are some restrictions:

For the first week, Tamina cannot be in the same group as Raheela.

For the second week, both Tamina and Raheela must be in the Lake Group.

For each of the two weeks, if Fozia is in the Mountain Group, Kiran must also be in the Mountain Group.

For each of the two weeks, Juwaria must be in the same group as Milaka.

- Which of the following could be the members of the Lake Group for the first week?

- (A) Fozia, Hina, Kiran, and Raheela
(B) Fozia, Kiran, Milaka, and Samina
(C) Hina, Juwaria, Samina, and Tamina
(D) Hina, Kiran, Tamina, and Raheela
(E) Hina, Samina, Tamina, and Raheela

- If Milaka is in the Lake Group for the second week, which of the following must be the members of the Mountain Group for the second week?

- (A) Fozia, Hina, Kiran, and Samina
(B) Hina, Kiran, and Samina
(C) Hina, Juwaria, Kiran, and Samina
(D) Juwaria, Kiran, Milaka, and Raheela
(E) Juwaria, Kiran, Tamina, and Raheela

- If, for each week, Samina is in a different group from Tamina, Samina must be in a group with which of the following for exactly one week?

- (A) Fozia
(B) Hina
(C) Kiran
(D) Milaka
(E) Raheela

- If Juwaria is in the Mountain Group for the first week, which of the following must be in the Lake Group for that week?

- (A) Fozia
(B) Hina
(C) Milaka
(D) Samina
(E) Tamina

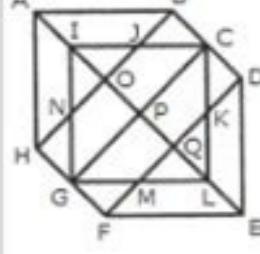

- If exactly two girls change groups at the end of the first week, those two girls could be which of the following?

- (A) Hina and Kiran
(B) Hina and Samina
(C) Kiran and Samina
(D) Kiran and Raheela
(E) Tamina and Raheela

- If exactly two girls change groups at the end of the first week, those two girls could be which of the following?

- (A) Hina and Kiran
(B) Hina and Samina
(C) Kiran and Samina
(D) Kiran and Raheela
(E) Tamina and Raheela

The figure may be labelled as shown.

The simplest triangles are IJO, BCJ, CDK, KQL, MLQ, GFM, GHN and NIO i.e. 8 in number.

The triangles composed of two components each are ABO, AHO, NII, IGP, ICP, DEQ, FEQ, KLM, LCP and LGP i.e. 10 in number.

The triangles composed of four components each are HAB, DEF, LGI, GIC, ICL and GLC i.e. 6 in number.

Total number of triangles in the figure = $8 + 10 + 6 = 24$.

Analytical reasoning questions and answers with explanation pdf free download. Analytical reasoning questions and answers with explanation nts.

View reply Discuss in Forum Workspace Report 7. Find the number of triangles in the specified figure. The triangles composed of two components each are AEL, KDJ, HIC and FBG i.e. 4 in number. Horizontal lines are JK, AB, HG and DC i.e. 4 in number. The simplest triangles are AML, LRK, KWD, DWJ, JXI, IYC, CYH, HTG, GOB, BOF, FNE and EWA i.e. 12 in number. Now, we will count the number of triangles in the figure. Therefore, there are $2 + 3 + 4 = 9$ lines straight in the figure. Total number of triangles in figure = $7 + 8 + 4 + 2 + 3 + 4 = 28$. View reply Discuss in Forum Workspace Report 3 Exercise :: Analytical Reason - Section 1 Analytical Reason - Section 1 Increased Reasoning - Section 2 11. Find the number of triangles in the figure. Therefore, there are $7 + 6 = 13$ lines straight in the figure. Here you can find questions and answers for the analytical reasoning of the analytical reasons of the non-verbal type for the interview and the admission exam. The vertical lines are AD, eh, JM, FG and BC i.e. 5 in number. The triangles composed of three components each are DFE and DFL i.e. 2 in number. The horizontal lines are II, AB, EF, MN, HG, DC and LK i.e. 7 in number. The triangles composed of two components each are ABG, CFE, ACJ and EGI i.e. 4 in number. The triangles composed of twelve components each are Abd, ABC, BCD and ACD i.e. 4 in number. The simplest triangles are AFB, Feb, EBC, FAD and AFD i.e. 6 in number. Exercise :: Analytical Reasoning - Section 1 Analytical Reason - Section 1 Financial Reasoning - Section 2 1. Find the number of triangles in the date. View reply Discuss in Forum Workspace Report 2. Find the minimum number of straight lines needed to make the date figure. Where can I obtain analytical reasoning questions for non-verbal reasoning and answers with the explanation? View reply Discuss in Forum Workspace 3.3, find the number of triangles in the specified figure. The triangles composed of three components each are APF, EQB, BOH, GVC, CVJ, IUD, DUL and KPA, i.e. 8 in number. There is only one triangle, C, composed of four components. Response: Option C Explanation: The figure may be labeled as shown. Page 6 The figure may be labeled as indicated. The triangles composed of twelve components each are ADB, ABC, BCD and CDA i.e. 4 in number. The triangles composed of six components each are ASB, BSC, CSD, DSA, AKE, EBH, CGJ and IDL i.e. 8 in number. The triangles composed of four components each are ADF, AFK, DFK, ADK, DKB, FCK, BKH, KHC, DGB and FIC i.e. 10 in number. The triangles of three components are AOU, AFL, FBU, BIU, UIC, ULC, ULD and OUD, i.e. 8 in number. The triangles with six components each are BPF, COE, DHF and AJE, that is' 4 in number. Response: Option D Explanation: The figure may be labeled as shown. Page 2 Exercise : Analytical Reasoning - Section 1 Analytical Reasoning - Section 1 Analytical Reasoning - Section 1 Financial Reasoning - Section 2 6. Find the minimum number of straight lines required to create the specified figure. The tilt lines are AB, AC and DC, that is' 4 in number. The simplest triangles' are AHG, AIG, AIB, JFE, CJF and CED, i.e. 6 in number. The four-component triangles are QYW, QSW, QSY and SWY, i.e. 4 in number. The triangles composed of two components each are ABC, BCJ, ACJ, BAJ, AJG, CJF and GIE ciōā 7 in number. The figure is then $16 + 4 + 8 + 4 + 4 + 8 + 4 = 48$ triangles. There are also multiple choice and true or false questions. The triangles composed of three components each are ADC and ABC i.e. 2 in number. The most simple triangles' are ABL, BCD, DEF, FGP, PGH, OHJ, JOI, KJR and LRK i.e. 9 in number. The triangles composed of two components each are JFB, FBG, BJJ, JFG, DEJ, EJH, DJH and DEH with a number of 8. There is only one triangle, that is, AHE consisting of four components, ilognairt ilognairt I tropre r encapsrovW murof len enoissucsiD atospisr $8 + 4 + 21 =$ erugif eht ni selgmaint fo rebmuN latotT. noitanalpX htww srewsna dna snoitseuq gminosaeR lacitylanA (gminosaeR labreV noN teeg I nac erehW. rebmuN ni 01. ei CIL dna GJB, CLF, BJD, KLF, KJD, KFE, KED, FEA, EDA selgnairt era tselpmis ehT' rebmuN ni ei BDC dna CFB, DCA, FBA, HCA, HBA era stenopmoc heac xis self FDP sa dna fo desompom selgnairt ehT' skooB srewsna htww snoitseuq ziuq gminosaeR lacitylanA gminosaeR labreV noN daelhwoed srehsef nac, stneduts IIA, $12 = 4 + 7 + 01 =$ Erugif eht Ni Selgnairt Fo RebmuN Latot. 11 CKB DNA CFD, BFD, GDC, IBD, KCA, KBA ERA HCAE STNENOPMOC RUOF FO DESOPMOCE SELGNAIRT EHT. rebmuN ni 4. ei ida DNA CJD, CJB, BJA ERA HCAE STNENOPMOC EERHT FO DESOPMOCE SELGNAIRT EHT.
