To register for a station, you need to log in (from the panoramic area, using the small cog icon at the top right) , so Â ¢ â,¬ "for" a station, find a show from the page Â ¢ â,¬ â "Schedule + catch-up" (Select a previous date first), then press Â ¢ â,¬ Â "Subscribe" ... you will ask you to enable notifications without explanations about why - it didn't win if you reduce. Suppose they are using notifications to activate Downls OAD of new shows (rather than the polling of app r every 30 minutes), but just as long as they could do it to annoy yourself with notifications (ie. Â ¢ â,¬ "used me, you didn't use me for at least a day ... problem). I probably need to go out more but I was really excited by the addition of car play to this app. Imagine the my sad disappointment when I found that everything you could do was to play the current live show! Who is this aimed at global radio? surely every carplay audio system compatible with carplay will also have a DAB radio receiver? LBC is A national station broadcast throughout the United Kingdom on the DAB. Why use your garment data to grind the unreliable 3G / 4G network whistle when you can tune the car radio? If you have only an old FM radio, it is unlikely Whether you have the careplay so you can't be? What really I want carplay compatibility to be able to play downloaded shows - would be sincerely brilliant. Next update maybe? I joined the servants LBC recovery uncle for years and was very happy to pay a subscription fee for this service. He recently purchased a new phone and found that the app is no longer supported and you must now use this larger and inferior lower version. Every time you transform it, you have to watch an introductory video ad and long news, travel and advertisements that used are not deleted in recording. I listen a lot when I'm driving and, because I don't want to reach my phone while trying to keep your eyes on the road, now I'm forever to listen to the boring information and without the date that enormously give my enjoyment. Surely LBC must realize that people have subscribed to the service to listen to their favorite presenters, not different relationships on daily traffic !! Please bring the service back as used to provide it; I would be more than happy to pay a higher subscription if it would be necessary.
