Facebook has existed for ten years and a few years, and over time, he played an important role in the social networks sector. Image, video, employees and more on Facebook has come a long way! Now that is almost part of everything we do in our lives. In addition to the publication, we can also speak to our families, friends and others. Here is Facebook Messenger! The application feature is fantastic! You can send a message and chat with people, make audio or video calls with others, send photos and videos, send audio recordings live and more! The only thing that does not seem to take into account is to send files such as PDF and Microsoft Word Documents, Excel Dreakeets and PowerPoint Presentations. In this article, we will show you how to send files to Facebook Messenger! How to send files via a smartphone (Android, iPhone iOS) because the Messenger application can only send images, videos and live recordings, the most common question by asking Google is "how to send files to Android / iPhone Messenger "in the Messenger application! You can send files such as PDF and other documents simply using your smartphone browser! «Open the web browser on your phone (Google Chrome, Apple Safari and other browsers) Enter www.facebook.com / M.FFEBook / Messenger.com, one of the three web addresses mentioned above in the bar address / url bar on your web. Browser and click the Enter button. Once you have connected to Facebook or Messenger, the next thing to do is access the web / desktop version on Facebook or Messengogle Chrome and more. When you are on a Facebook or Messenger web page, identify a three -point icon on your network. Browser and click on it. You will see several options, you must find the desktop site option and click / select to access the website / office website. Apple Safari: For iPhone users who use iOS 13 when you are on the page, click on the "AA" button in the upper corner of the address bar and select the "REQUIR on the option" option. If you use the iOS 12 and previous versions, save the update icon and a pop -up window will appear. Click on the Archiedi Desktop desktop site to access the website / office website.Many of us ask the same question over and over: "How do I send files to Messenger?" Facebook has been around for a decade and has played an important role over time. A role in the social media industry. Facebook has come a long way from posting photos, videos, statuses and more! It is now part of almost everything we do in our lives. In addition to broadcasting, we may also communicate with our families, friends and others. This is where Facebook Messenger comes in! The functionality of the program is excellent! You can send messages and chat with people, make audio or video calls with others, send pictures and videos, send live audio and more! The only thing skipped seems to be to send files like PDF and Microsoft Word documents, Excel spreadsheets and PowerPoint presentations. In this article, we will show you how to send the file to Facebook Messenger. How to send a file using a smartphone (Android, iPhone iOS) The most common question on Google is "How to send a file to Messenger for Android/iPhone" as Messenger can only send pictures, videos and live streams. , there is a simple answer: not possible in Messenger! You can send files like PDFs and other documents using only the smartphone browser! Open a Web browser (Google Chrome, Apple Safari and other browsers) Enter www.facebook.com / m.facebook.com / messenger.com in the Web Browser's address bar, enter any of the above three web addresses. and press Enter. You are logged into Facebook or Messenger, another thing you need to do is access the web/desktop version of Facebook or Messengergoogle Chrome. When you're on the Facebook or Messenger website, look for three browser spots on your website. Different options will appear. You need to find a site for a pc for your pc and click/check it to switch to the web/web site version for pc. Apple Safari: iPhone users with iOS 13 should click the "AAA" button in the top corner of the address bar on the page and select "Question for Desktop". If you are using iOS 12 and above, press and hold the Refresh icon and a pop window will appear. Click "Desktop Request" to enter the website/business of the page. Sign in with your data such as username and password.Press the "Register" button to register with your account where you are registered at www.facebook.com, you can open the chat field or go to the "Messages" section of your profile and see all your conversations with other people . After you have registered at Messenger.com, you can open chat boxes directly. Or "paper". This opens the Android menu (for Android users) or the iOS menu (for iOS users) with the option to add or send files. Select the file you want to send and after selecting the file/files, press the "Send" button. Smartphone! If you have not yet decided on this method, there is another way to send files! This method requires a smartphone and a computer or laptop. How to send files with a computer or laptop: First you have to transmit the files/ files that you want to send from your smartphone to your computer or laptop. Open and enter Facebook or Messenger.com/ in the URL bar and enter 2. When the page is loaded, you need something about your and information such as the user name and password, then press the "Register" button and press a press on it to open the file menu on your computer or laptop. Select the file (s) you want to send and press open or enter the button. The file (s) is automatically sent to the recipient. 6. If you see it in conversations, you can download the file. Now you know how to send a file/files in the messenger to both smartphones as well as on your PC or laptop! Send large/large files via smartphone or computer Facebook messenger definitely supports files such as PDF, Word documents and more! However, it has restrictions such as sending large/large files (files greater than 25 MB, which is the limit of Facebook)!Sending large files to Facebook Messenger! There are three ways to do it! By uploading one or more files and creating a download link1. The first thing you need to do is open a web browser and access file exchange services, such as filebin.net and file.io.2. As soon as you are on the site, read and follow the steps to create a download link. Basically, you upload your file(s) and they will generate a download link for you in seconds! 3. As soon as you receive the download link/URL, copy the link, insert it in the message window and send it to the person(s) you want to send it to 4. A person who has received a link can automatically download one or more submitted files by clicking on the link and opening it. Download links are usually helpful if you're trying to send large/large files to anyone through Messenger. Uploading files/file swapping like Google Drive, Dropbox or others. Web browser or you can also load Google Drive directly from your smartphone app store or game store. On a PC/laptop is a web browser and enter in the address line. Entering the link, click Enter. You can see all files and folders stored on the disk. You need to find the "Upload" option and click on it to upload one or more files that you want to send. For smartphones, this will open the iOS or Android menu. For computers or laptops, this will open your computer menu. Find the files you want to upload and click "Open" for automatic upload. You need to click on the three dots icon to see more options. Click the "Copy link" button and it will automatically copy the link to the swap buffer or show the link to the file you can copy. Lift the link to the message box you want to send to Messenger and send it. You can open a link in your web browser. As soon as you're there, Google Disc first asks you to request access, which basically means that it needs your permission for someone to access the file for the first time. You will see a request request when it sends a request. YouPress the "OK" key to reach the case. Now you have access to the file (screen, copy, editing, download). Google also has an option to provide a file for anyone with a connection, you do not need to "access". This option is in the three -point icon, so you can find the opportunity to "share". By squeezing the file/files in the archive, the files can be squeezed only in the ZIP archive! We start with smartphones, then computers/laptops. Why do you probably ask for file compression? This is because the file/file licking you want to send is that it can actually reduce the file size so that you can upload it to Messenger. Games or App Store offers many mail control tools, such as smartphones, zachiver, rar, IZIP and more. You can download any of these and start squeezing files with zipper files! You can also switch to Eyzip.com or other Zip by creating a page to your phone browser and entering there. When downloading the application, open and then see the phone menu file and select the files/files you want to compress. Once you've already entered the Web, you need to install files or "upload" to enter the file menu and select the file/files you want to send. After selecting the file/file, you must press the "Open" button. Or in the zip archive compression file/file squeeze enter and work. When the files/files are squeezed into the ZIP file, you can now send the file to Messenger, how to send files above (Android, iPhone iOS) (Android, iPhone iOS), because Facebook Messenger A is limited to limited photos, video and direct message sending Can be downloaded automatically by clicking on the Zip file. You can switch to ezyzip.com or other zipper creation pages in your web browser and install it to create a zipper file. First you need to find / files you want to squeeze. Use. Use. Files / files. Then select select."From the context menu. After selecting the "Send to" (ZIP) folder, you must select/click on". Name the ZIP file by right-clicking and selecting "Edit Name". Then enter a new file name. After creating the zip file, you can send the file to Messenger. To send a zip file, follow the steps above (How to send a file using a computer or laptop). Because Facebook Messenger is only limited to sending photos, movies, and live broadcasts. The recipient can automatically download the zip file by clicking on it. Now let's go to the FAQ about "how to send files on Facebook Messenger! FAQ: Can you turn on file in Facebook Messenger? Yes! You can. Wheel to see how to do it. Why can't I send files on Messenger?
