How most applications eat in you will never get the image full screen. ĀĀĀActivity(Label = "Mobile App", Theme = "@style/splashscreen", Icon = "@drawable/icon", MainLauncher = true, ConfigurationChanges = "ConfigChanges.Orientation, LaunchMode = LaunchMode.SingleTop)]) public class MainActivity : Xamarin.Forms.Platform.Android.FormsAppCompatActivity In OnCreate, switch your theme with the below code. Simply rebuild the .Droid project to get rid of these error. The splash screen will stay visible until the first page of the app is ready to display. The LaunchScreen.storyboard could be the issue. UWP UWP uses an image to display as a splash screen. UWP wants you to display your logo in the center of the screen and have a plain colored background. Move down the properties page to add image for iPad apps. Ensure no other activity has MainLauncher=true. Visual C# > Apple > Empty Storyboard In the Toolbox window, drag and drop a View Controller and then an UIImageView inside the View Controller. Step 5 - WebAssembly In the .WASM project, navigate to WasmScripts/AppManifest.js Add your splash screen image var UnoAppManifest = { splashScreenImage: "Assets/SplashScreen.scale-200.png", splashScreenColor: "#007BD7", displayName: "SplashScreenSample" } Currently, you need to set an explicit scale for the splash screen image. Add these images under the Assets folder of the .shared project, and set their build action as Content. Then set the Background Color option on the screen to the same solid background color as per the example below. Create a splash screen image in the following sizes. Xamarin Forms does not have any functionality to add a splash screen, you must do this per platform. Add your image path to the Image View Add- New item ... in mainactivity.cs, change the default theme to the opening screen. Image of 9 patches Changing densities and resolutions Cause a problem with opening screen images for Android. Scales table UWP esos android 100 scale-100 @ 1x mdpi 125 scale-125 n / an / an / a 150 scale-150 n / a hdpi 200 scale-200 @ 2x xhdpi 300 scale-300 @ 3x xxhdpi 400 scale-400 n / A xxxhdpi Get the full code See the complete sample in GitHub: SplashScreensample Help! I'm having problems if you had difficulties with any part of this guide, you can: Posted: October 9, 2016 / By: Adam / In: Code An opening screen is an image or page showing when you load your application For the first time, while the application is being initialized. It will automatically add them to the Foreign Resources in your iOS project. Place this in Features> Values> Style.xml (Construction Action: Android Resource)
