Professor Messer is a great resource. I also found great value in Mike Meyer's Udemy courses and practical exams. Prarcitic exams can especially show that you need to brush yourself before taking the real exam, and can help increase your trust entering it as well. Good luck for you. Spice (7) Flagreport 3 found this thumb up A'Humb down I'm working on my a+ currently too. Professor Messer and Mike Myers is helping me a lot. The tests you can get with both are the same. Plan to schedule my first test soon. Spice (3) Flagreport 2 found this one that is thumb up thumb down my plus hired me at a help table in a dose and change the highest rate than those who had no. (Very large MSP that had vain business accounts. Plus checks a box for you to be placed in a more "valued" account.). So for me Plus was definitely worth it and paid for him. Which is more than I can say to any other certificate I have, net plus, security plus, linux plus, project plus, ccna, secure CCNA. Although I have learned a lot from these certificates and they may be checking some boxes for HR, I have never been able to point to any of them and say that they are directly made me more money. Also the plus seems to attract high of recruiters in really looking to fill in positions type of help desk. I took it out of my curriculum and stopped sending me emails. I imagine that they only have bots crawling in looking for keywords, the plus being one of them. So, if you are looking to start with you yes, the plus is defiantly is worth again Meh not so much. But answer your question: According to Professor Messer, it is free and the notes that are cheap also odartnocne odartnocne 2 tropeRgalf )3( ecipS .siaer semaxe sot odrep etnemlaer res arap nosoB ed acit;Ard ed semaxe so iertnocne ue orac odal on eq ot'nauqE .saob helpful thumb up thumb\_down l never really got into pre-made flashcards, found it more useful to just jot notes in Word or just simple txt dock. But I've seen people recommend Quizlet and there are others, just google for 'online Flash Cards' -A A A NOTE: Flashcard Machine used Comptia for query...A A sure about online or available exams - again, I usually just make my own - I recall there are many pay sites, and mileage varies. You might find an inexpensive one worth it... this guy on Reddit praises Professor Messer and his for-pay exam questions.A A "I would recommend using Professor Messer on youtube. His youtube videos are always free. You can take the money that you would pay for the udemy course and buy Professor Messer's practice exams. They are great and prepared me very well." A A others, I used the Prof for my A. Net and Sec pluses.So good luck.A AOh, also note that if/when you get a higher CompTIA exam, you can include your lower ones under it. Spice (1) flagReport 1 found this helpful thumb up thumb down In addition to studying with Professor Messer, I've been using the "CompTIA A+ Practice Test 2021" app by ABC E-learning (on Google play). It's a good app for casual daily practice questions with reminders to take time for studying. When I have a break at work or have time to kill, I can flip through a few questions.A A Plus, you can select your projected test date and it'll calculate how many questions you'll need to master each day in order to be ready for your test date. It's been a good way to keep myself motivated since it's on my phone. I plan on taking the A+ and Net+ within the year.A A Spice (1) flagReport 1 found this helpful thumb up thumb down Not everyone learns the same, but simply out the CompTIA Exam objectives, and going down the list researching and trying to understand each item really worked for me for all of the exams I've taken (up to and especially Sec+ because of the amount of acronyms). They come in .pdf too so that checks your digital criteria.Don't let anyone tell you A+ is useless either. It's packed with stuff that will continually come back up again in other courses, and it's best to grasp an understanding of it or at least be familiar with it sooner than that, otherwise your trying to learn too much at once, or at least that's my experience. Spice (8) flagReport 1 found this helpful thumb up thumb down Just got my A+ two weeks ago. I predominantly used ITPRO.TV for practice tests and flash cards. You'll need the premium personal plan but I highly encourage using it - there is so much other great content there. Professor Messer's YouTube videos and practice exams are great as well. Mike Meyer's book I bought a little too late to read in its entirety, but I'm on chapter 3 reading it front to back just to solidify what I've learned so far. Once I'm done with the book, it's on to Network+. You got this! Spice (2) flagReport 1 found this helpful thumb up thumb down Professor Messer is good, what I did to pass was I bought the Mike Meyers A+ all in one study guide and studied a chapter a night, making notes of things I thought would be needed. Some chapters took me hours and some maybe took one. It's a true grind, but you can do it. Spice (3) flagReport 1 found this helpful thumb up thumb\_down A lot of great info being recommended here, especially Professor Messer and Mike Myer's - you will definitely get your money's worth and then some from those two.A A Just remember, you're the one making the decision as to what exams you're going to take A A There is some credence to A+ being less than desirable, as it's geared heavily toward those who have zero to a year of experience in IT.A A You are ready to make this certificate, by all means, there is nothing wrong with making this certificate fill the gap to you can take a more advanced course. Good luck in your ventures! Spice (3) Flagreport 1 I found this thumb up thumb\_down a^ thank you very much for all the answers! Many information on this time! I will definitely check some of your suggestions! A little more context for everyone, I am completely self-taught (I studied the Youth Ministry at a bulk university in college). I ended up making a pivã. Now I am in my fifth year and, especially, I had positions of nois l or administrative support support positions. The goal for me at this time is to obtain A+ and perhaps network+ certificates with the ultimate goal of obtaining positions of no higher. I would like to continue my education without going back to school for a diploma where I just learn things I probably already know. In the hope of continuing to climb the ladder! Thanks again for all the answers! Spice (3) Flagreport This post was a^? Thumb up thumb\_down definitely, chase net+ sooner or later. Objective against in the long run, but with five years of exp, you can probably take the next step on the stairs now. Just my opinion :) Spice (2) Flagreport 1 I found this thumb up thumb\_down a^ I will just play my 2 cents here. Just for the context, all my certificates came from my own initiative and the desire to learn. Although my employer never required (or even asked) that I received them, I really wanted to learn the material and improve my "chops." All this to say, remember that the real value is not the certificate. The value is what you learn when obtaining the certificate. Even if it gives you some another hour, I feel that the long-term benefit is learning material well enough to know it as the back of your hand, with regard to comptia, I am the + net, + sec, + cysa, + and pentest+ certified. all these tests were beneficial for my daily workload at some level. I passed all the exams in the first attempt (even pentest, + that I even surprised myself with about 830 of 900.) and for every exam I read at least one book several times. However, since sec, + I did the following, buy the certmaster package, which includes the exam as well as the certmaster training. (for pentest+ I also bought your elearning platform.) read a book of mcgrall hill u other editor. highlight, read again, take notes/make flash cards; take certmaster training, use this as much as possible. The refreshments are fantastic. watch videos of jason dion, are very useful, usually they go on sale by 9.99, which is an absolute theft. I hope that helps! spice (2) flagreport 1 found this useful thumb up thumb\_down given that I took my a+ shortly after I had finished college, I could have had easier than if I had done it before u significantly after my graduation. However, much of what I found to be common sense/thing that I caught through mere osmosis of being in the world of technology for most of my pre-teen and teen years. I used examcompass, which has free trials for both parts of the a+ exam. it was a bit tedious in points, but definitely helped me learn some of the comptia asinin requirements. as a gamer, I still cringe whenever I think about the issues related to the construction of task-oriented computers, especially for a game computer (a component that was marked as correct was a sound card- who prays a sound card today!). spice (1) flagreport 1 ahnim ahnim a iessap eqm missa iof e /moc.adnyl.www/-:spth arap atiatarg arutanissa amu somahnAt .iehlabart odnauQ nwod bmuht pu bmuht lit^A etse never went for my Security + but there were training videos for that too.-Jared Spice (1) flagReport Was this post helpful? thumb up thumb\_down professor messer if your driving or have headphons in, they are all free on youtube.I bought the current A+ book when i was studying and just flip to end of the chapter and take the quiz anything you don't score over 90% on read the chapter and repeat until you consistently score above 90% Spice (1) flagReport 1 found this helpful thumb up thumb\_down As others have suggested, get the A+, Network+ and Security+ A A I used the Dummies books and listened to the audio along with reading.A A When I was not reading, I will still listening.A A I passed all of them with no classes. Spice (3) flagReport 1 found this helpful thumb up thumb\_down For Me... Taking practice tests was the best way for me to learn. There are a bunch available online for free and some on Ebay fairly cheap. This should get you started. Spice (2) flagReport 2 found this helpful thumb up thumb\_down After consulting with my local community college I found that their particular program is geared specifically towards the TestOut.com material.A A For A+ and a couple of others the exam is cross-recognized between TestOut and CompTIA.A A This particular degree program will take either TestOut or CompTIA successful cert tests in direct exchange for the classes they have, since the class is the training material for the exam.A A The TestOut content is self paced, fully online, recorded lessons in 3-10 minute bites, with the same content as reading material in between, lots of hands-on labs, and quizzes covering the material so you can see how well you are capturing the material.The moral!A A testout.comA A For \$80 / month I have unlimited access to the full spectrum of training material, and for each course one actual test is included.A A Even better?A A I'm .retsaMtreC AITpmoC on odalucirtam etnemlauta uotse ,+ceS araP .adnyL & .resseM rosseforP .ymedU ed ofAŠAanibmoc amu odnasu iebaca ,+N o araP +ytruceS an odnahlabart uotse e +krowteN o moc iuf e +A o ielup ue nwod bmuht lit^A pu bmuht etse uortnocne 1 tropeRgalf )1( ecipS .jAl ratse ofAŠ satnugred ed sopit euq arap ofAŠAasnes amu ret assop ^Acov euq arap aitpmoC acit;Ard ed setset so aŠAaf etnemavitinifeD .uotart ^Acov euq od rarit iav ^Acov edno ©A aicn^Airepxe ad etrap A .etset o arap rarbmel ed ue iebaca - aid me ejoh sasioc sad samugla ed orbmel em ofAŠ .etnemarecniS .etnemlaer air^Amem me ol-;Acipol e sasioc reversee rasciper iav ^Acov euq arap A .otache e oces repus ©A sasioc sad ocir^Aših odal O .aicn^Airepxe ohea ue e air^Aših - setrap saud jAh .odutse oa ot'nauQ .axiac asse racifrey airelop ue ,ol-igixe arap odnatsivertne avtase ue euq ofAŠAštop amu es .euq arap iof iugessnoc etnemlaicini ue laug alep ofAžar acin^A A .seroiam sasioc a uovel ossi siop .arietrac ahnim an aicn^Airepxe odnahag avtase ue ot'naugne .mim arap levArcni asioc amu iof^ .+ceS uem o airavner saM .arof jAl .Ašise euq o e lairetam ovon o rednerpa a odaŠArof uos ue euq zev adac etset o ramoter ed otsoq ue - odacifitrec uem pu-er arap oriehmid o ahnit ofAš ue euqrog raripxe aitpmoC ed sodacifitrec suem iexieD nwod bmuht pu .elop 7hUPA iof tsoq etsE tropeRgalf )1( ecipS .orbmezed uo orbmenon me +ceS ofAetnoc ues razilauta ed marabaca seIE 7ofAšne edsed on-marazilauta seIE ofAšne ortnocne od araf odnaci ratse aicerap e 5102 me alocese an avatase ue odnauq ol-om;AŠU 7odazilauta jAše moc.tuotseT nwod bmuht pu bmuht lit^A etse uortnocne 1 tropeRgalf )1( ecipS .osseusc ed edadlilaborp amu artsom ofAšiver ahnim es .anames amix^Ard an laer etset o rezal odnarepse ,ofAšiver ed lairetam on odnahlabart .+ceS odnezaf moc moc racifrey .ACID .resseM e ymedU moc odnatnemelpmoc m©Ašmat Local Library to see if they are partnered with Udemy (and LinkedIn Learning ( . At Udemy, I was able to enroll for free in Jason Dion, Mike Meyers courses, etc. Spice (1) Flagreport was it? THUMB UP THUMB DOWN The best way to win your A+ certificate (and yes, it really is a good IDO © to you) is building a system from scratch and then install Windows 7 and Windows 10 later in a configuration Double initialization. I used a broom to move my first system built across the room so I could run to the front door when I led for the case of triggering. Son, I took my time learning what I needed to know to build it and did it and worked. After that, I had no problem passing a+ cert. I do not do this strictly with book learning. When you are proof in a job interview or in the technology, it bites it in the ass. Get your network + then, followed by security +. I was at I.T. For 20 years, I get to know my sh-emerge, things. Spice (2) Flagreport This post was a^? Thumb up thumb\_down I agree with you. Certainly not to stop certification A+, but it is a starting point to obtain the certification experience and be better prepared for more diffiency exams. I remember my first exam, and yes, it was a+, I didn't have absolutely no ideas to expect. Having to empty my pockets, deliver my phone, upon the relief and the wallet. Subscribe to some advertising contract, then enter a long salon and thrown into a room full of microphones and vidcams. Half stressful for the first time. It is already bad enough that you disburse all this money to a test, pass or fail, but the whole process increases the no stress while doing the test! JGRAY-19 wrote: WARKRAFT wrote: I would waste my time on A Plus unless you're just a hardware technology. I would go to Net Plus and thela addition, I would have to disagree with it, I have my plus and network plus. I think Plus was a great stone to give me an idea of what the exams would be like. This was about 10 years ago, so now they have expired and I should be renewed, but that's a different story. Most of my career, I worked Service Desk positions, but I found these two certificates help me do more work, so just hardware technology. Spice (1) Flagreport This post was a^? pole up thumb down I used ITPRO for inclination logs and training and certificates. They are divided into 20 to 30 minutes that deal with all objectives; in addition, they are very practical and virtual laboratory certificates. Here is a link to the ITPRO website. Spice (1) Flagreport 1 found this thumb up a^ thumb down I agree with the suggestions itpro.tv. The tests, flashcards and videos are exactly what I used to study for my CERT. They also virtual laboratory that you can use to have an experience. It is fair to all the other counts that you welcome well and definitely adhere to it to study for those other certificates you plan to take. Spice (1) Flagreport This post was a^? thumb up thumb\_down
