Some of the best advice you can get when you start translate words. Sometimes what you want to translate for meaning rather than to translate words. Sometimes what you want to translate words. Sometimes what you want to translate words. saying — not just the words the person is using — will pay off in doing a better job of conveying the idea that someone is trying to get across. When translating individual words. Literal translations often fall short because they can fail to take into account the context and nuances of meaning. There is often no single "best" translation, so two translators can legitimately differ on their word choices. One example of an approach you might take in translating from one language to another, how do you decide which word to use? I'm asking because I saw recently that you translated llamativas?" (taken from a Spanish-language Maybelline mascara ad) as "The revolutionary formula for getting bold eyelashes?" The writer was correct that dictionaries don't give "bold" as a possible translation, but "bold" as a possible translation, but "bold" as a possible translation, but "bold" as a possible translation of what I used in my first draft: Then I used "thick," which isn't even close to any standard of llamativo. Let me explain the various philosophies of translation before discussing that particular word. In general, it can be said that there are two extreme approaches in the way one can translate from one language to another. The first is seeking a literal translation, sometimes known as formal equivalence, in which an attempt is made to translate using the words that correspond as exactly as possible in the two languages, allowing, of course, for the grammatical differences but without paying a great deal of attention to context. A second extreme is paraphrasing, sometimes called making a free or loose translation. One problem with the first approach is that literal translations can be awkward. For example, it might seem more "exact" to translate the Spanish obtener as "to obtain," but most of the time "to get" will do just as well and sounds less pretentious. An obvious problem with paraphrasing is that the translator may not accurately convey the intent of the speaker, especially where precision of language is required. So many of the best translations take a middle ground, sometimes known as dynamic equivalence — trying to convey the thoughts and intent behind the original as close as possible, veering from the literal where needed to do so. In the sentence that led to the reader's question, the adjective llamativo doesn't have an exact equivalent in English. It is derived from the verb llamar (sometimes translations such as "to call"), so broadly speaking it refers to something that calls attention to itself. Dictionaries usually provide translations have somewhat negative connotations — something certainly not intended by the writers of the ad. The others don't work well for describing eyelashes. My first translation was a paraphrase; mascara is designed to make eyelashes that Maybelline customers would want. But upon reflection, that translation seemed inadequate. This mascara, another part of the ad pointed out, not only makes the eyelashes look thicker, but also longer and exagerated." I considered alternative ways of expressing llamativas, but "attractive" seemed a bit too weak for an advertisement, "enhanced" seemed too formal, and "attention-getting" seemed to convey the thought behind the Spanish word in this context but didn't seem quite right for an ad. So I went with a positive connotation that might work well in an ad. (If I had wanted to go for an extremely loose interpretation, I might have tried "What's the secret to having eyelashes people will notice?") A different translator very well might have used a different very well might have used a different translator very well might have used a different very well well a that can involve judgment and creativity at least as much as it does knowing the "right" words.
