

What is the app android system webview

Continue

Developing an app takes a lot of time and work. But, what if there’s a way to build an Android app without writing a single line of code or investing thousands of dollars in app development? That’s exactly what Android app templates allow you to do. Using an Android app template, you can build a fully functional app for your business, online store, and create powerful native and web-apps without having to break the bank. In this post, we feature some of the best pre-made Android app templates you can use to build your own mobile apps without coding. Why Use Android App Templates? Mobile is the future. And every online business, news website, and eCommerce store needs a good mobile app to provide a more convenient service to its customers. However, it could cost between \$25,275 to \$727,500 to build your own app. Not every business can afford that price, especially when you’re starting new. That’s why using an Android app template is the best solution for building a simple app for your business. They cost less than \$200 and you can easily edit and customize them without having to spend money on hiring expensive app development agencies. The Android app templates we handpicked for this list are just as good as any other app you find in the Google Play Store. Have a look. NewsApp – News & Blog Android App Template If you’re planning on bringing your online magazine or news website to the Android platform as a mobile app, this Android app template will come in handy. It’s been specifically designed for blogs, magazines, and news apps. The template includes all the necessary elements of a news app. And it comes fully coded and with a beautiful user interface design. The template is also very easy to customize and configure. It even includes the PSD files for editing the design of the UI. Foodviser – Food Ordering Android App Template This Android app template will allow you to create a complete food ordering app for your restaurant or cafe. In fact, you can even use it to add a food ordering system to your other service-based apps as well. Foodviser comes with a stylish user interface design that allows you to highlight your food items and dishes in an attractive way. It also features a streamlined process to help users order their food without any frustrations. eKart – Android Ecommerce App Template Ever since the pandemic, many businesses rush to develop online stores and delivery systems to serve their customers. But it’s a tough process to develop mobile apps quickly. Thankfully, you can now setup a quick mobile app for your business using a template like this one. eKart is an Android app template for eCommerce businesses and online stores. It includes a complete native app experience starting from user registrations to shopping carts, checkout systems, and a delivery boy module. Hungry – Grocery Delivery Android App Template If you’re starting an online grocery store or planning on offering deliveries from your existing store, this Android app template will help you build a complete mobile app to allow customers to place deliveries directly from their phones. Hungry is a complete grocery store android app template that includes a full online store section with a delivery module. It also has a delivery boy app module for offering a companion app for the persons carrying the deliveries. RocketWeb – Android WebView App Template One of the easiest ways to bring your existing websites, blogs, and news magazines to mobile app platforms is to setup a WebView app. They are lightweight, very easy to setup, and requires little to no maintenance. RocketWeb is the perfect Android app template you can use to setup an Android WebView app for your website. It’s fully customizable and you can change its colors and themes however you like. You can customize the app without coding. RocketWeb comes in an iOS version as well. Web2App – Lightweight Webview Android App Template Being able to monetize your app is an important part of developing mobile apps. This app template ensures that you are able to not only create a powerful WebView app but also earn money from it. Web2App is a lightweight Android app template you can use to create WebView apps for your website, blog, or online store. It features a complete app experience with a drawer, push notifications, and support for Google AdMob for monetizing the app. Ecommerce Solution & Delivery App Android Template If you’re working on bringing your local business online to offer an eCommerce experience, this web and app template bundle will offer a complete solution for all your needs. This is a 4-in-1 bundle that comes with a Laravel website, a native Android app for customers, another delivery boy app, and a powerful CMS to manage all platforms in one place. With this collection of templates, you can build an easily manageable eCommerce solution for your online food store, grocery store, pharmacy, and more. Delivery Boy for Multi-Restaurants Android App Template With the rising demand for home deliveries, it’s the perfect time to build a delivery app for your restaurant or even a startup like GrubHub. This app template is made just for creating apps for such businesses. This is an Android app template you can give to your agents to manage their deliveries and incoming orders. Built with Flutter, the app allows you to manage multiple restaurants and directories. It supports push notifications, payment on delivery options, Google Maps integration, and much more. AdForest – Classifieds Native Android App Template Using this Android app template, you can setup a native app for a classifieds business or even offer a companion app for your existing classifieds website. AdForest offers a complete solution for creating a classifieds mobile app. It features user profiles, registrations, user submissions, and more. It also comes with a WordPress theme with a matching design for setting up a website for your mobile app as well as an iOS version. And create a system to sync the data between all platforms. Video Conference Android App Template If you’re looking for a way to create a video conferencing system to host private meetings for your team or even looking to create a Zoom competitor, this app template will come in handy. This Android app template allows you to create your own video conferencing app to host video calls without having to worry about privacy or expensive pricing plans. The app supports integration with Firebase and OneSignal as well. Universal – Multipurpose Android WebView App Template If you’re a freelance developer, you’ll certainly find this unique Android app template quite useful as it allows you to make many different types of app using a single template. Universal is a multipurpose Android app template featuring more than 15 different content integrations such as WordPress, WooCommerce, YouTube, Instagram Twitter, and much more. You can use it to create web app, streaming apps, podcasting apps, online store apps, and many other types of useful apps. MasterStudy LMS Mobile App Template (Android & iOS) An online learning system is now a must-have for every school and college. And offering a mobile app with your learning management system (LMS) is a part of that process. Master Study is an easy to use LMS mobile app you can use to setup a mobile app for your online learning system. The best part is that it comes in both Android and iOS versions. So you can offer the app to a wider audience. It has everything from course directories to checkout systems, quizzes, assignments, and much more to make a complete LMS app. PixelPhoto – Photo-Sharing Social Network App Template If you’ve been dreaming about creating your own social networking app like Instagram, now is your chance to make that dream come true. PixelPhoto is a feature-rich Android app template you can use to create a photo-sharing social networking app. The app has all the necessary features for building your own Instagram-like app complete with user profiles, chat system, search, explore section, and more. All in One Status Saver Android App Template Using this app template, you can create and publish a useful tool that allows users to save and download images and videos from sites like Instagram, TikTok, and Facebook. The app supports integration with multiple platforms including Facebook, Instagram, Twitter, WhatsApp, and TikTok. It also sports a very beginner-friendly user interface. TicTic – Video-Sharing Android App Template As you can guess from the name, this app template allows you to create your own TikTok-like social networking app with all of its video-creation tools and features. With many countries boycotting TikTok, now is probably the best time to launch an alternative app. This app template has all the features of TikTok, including song selections, audio dubbing, lots of filters, effects, and so much more. Cash Rewards – Android App Template Customer loyalty and rewards-based apps are quite popular on the Google Play store. With this template, you can also create one of your own. Cash Rewards is a CPI offers app that you can use to create an entire business of your own. You can use the app to promote other apps and services by offering rewards for users for interacting with the promoted products. The app supports integration with AdMob and AdColony. It also supports integration with PayPal, Steam, Paytm, and more for withdrawing funds as well. Android Video Editor App Template Start your mobile app business by offering a simple video editing app on the Google Play store. This template will help you get started. This Android app template features a simple and easy to use video editor for mobile devices. Users are able to cut and edit videos as well as mix audio, create GIFs, add effects, and do much more with the app. Quiz Online – Android Quizzes App Template Quizzes are one of the most fun activities you can do online. With this app template, you can create your own quiz app for Android. Quiz Online is a complete quiz Android app that comes with a great user interface and a beginner-friendly quiz system. You can use it to create a quiz-based gaming app or even use it for educational purposes. Make sure to create an iOS version for your app. Browse our collection of iOS app templates for inspiration. Find the best mobile app templates for your next project, across a huge range of different niches, industries, and design styles. Read the Feature –
