Konami unveiled details of the first Metal Gear Solid V DLC, The Phantom Pain. As we processed the information extracted from the game files after launch, the game had some data files that mentioned the costumes of Metal Gear Solid 3 and Eva. You can read it here. Konami revealed today at the Tokyo Game Show that Metal Gear Solid V will get new outfits as DLC with classic Metal Gear Solid 3 costumes. There is also an outfit for the D-Horse available as a DLC. These costumes also include a dress from Sneaking Suit, Tuxedo and Snake Naked. In addition to this DLC, Konami also unveiled clothes for the staff of the Female Combat Unit, featuring Eva and The Boss. There is no information available yet, including the price and release date of the DLC, but we should know more soon. This DLC also seems to be for the single player part of the game instead of Metal Gear Online. Metal Gear Solid V: The Phantom Pain is now available on PC, PS3, PS4, Xbox 360 and Xbox One. Let us know what you think of this news in the comments below. I don't have much time to have Quiet as a companion available in The Phantom Pain (this was announced about a year before the game was released, spoiler warns my ass), but her costume development tree, as far as I can see, is: 1) covered in blood, 2) completely silver, and 3) completely gold. I hope/I believe, since these unlocks are tied to the "level of bond" of Quiet and Snake, that it's an elaborate Goldfinger joke. I'm not quite involved in the story that I know how Quiet became very naked, but at least I heard the initial explanation of why she is, which is certainly not up to Kojima, "But once you recognize the secret reason for her exposure, you'll be ashamed of your words and your deeds". Because, you know, it's still a lot of bullshit he invented, however well rationalized in the game, and because it was clearly designed to encourage sales of cosplay and figures, as Kojima admitted. Anything, anything. The main point is that Quiet has some late game duds if the mascara and sliding stockings seem to start boring you. There's a cameo Sniper Wolf costume (redo quiet combat on Extreme) and another uniform that actually looks pretty big (you should unlock it normally, make sure you do the side mission to clear the mine). It's a very standard look, but she breaks it. Remember, this is a pretty big/stupid trick to deal with Quiet. UPDATE: Konami has updated the descriptive text on the DLC item. UPDATE: Konami has updated the descriptive text on Eva's DLC outfit, removing the previous mention about it, providing a tactical advantage. PlayStation Store now reads that the item can be decompressed as "a bold fashion statement". Description of the item in the game itself: The same one, anyway. ORIGINAL STORY: Yesterday Metal Gear Solid 5: The DLC of Phantom Pain's costume has arrived on PC and PlayStation Store North America, and we are a little disconcerted. As stated above, the description of Eva's suit noted that "the chest area can be detached for a tactical advantage." We are becoming increasingly convinced that there is no such effect. We asked Konami to clarify what he does exactly, and we're still waiting for an answer. After turning around for an hour with Eva's new costume I was hard pressed to notice any effect he had on enemy soldiers. It's like I'm not alone in this. As such, it simply seems to be a bad joke, because Kojima loves boobs and figures you do too. If you are looking for a real "tactical project", it is not worth plundering this breast. Not only does the Eva costume offer no practical effect, but it also costs in-game currency in addition to its question price 79p. It costs only 10k GMP, which is not much, but it still seems a bad form for the content that also costs real world money. At least it unlocks instantly. The other female DLC costume based on Boss's white suit also costs 79p and has an even more rigid requirement to unlock with a price of 30K. In addition, it takes 36 minutes to develop in real time once you choose to unlock it in the game. At least the head costume has a real purpose as it silences your footprints and prevents your body from being detected by soldiers wearing night glasses on the FOB missions. Snake can unlock a number of costumes, skins and uniforms in Metal Gear Solid V: The Phantom Pain. The game allows players to develop and customize utilitarian costumes such as Battle Dress, Suit Sneaking, etc. but players can also unlock secret costumes through other means. The curious DLC costumes inspired by MGS3 for Gear Solid V: the phantom pain [Official Site] has arrived. They are clothes for male and female soldiers, snakes included, and showy gets for your horse, at the price of £ 0.79 each or £ 3.99 for all and seven. However, it seems that some are in fact and do not work properly. The seven clothes are the Snake fighting bounds, the outstructor dress, and the tuxedo of the snake eater, the EVA and the clothes of the head, and the "parade" and the "western" turnover for the D-Horse. Here, look, they are all in this steam beam. They cost 1,000-300,000 GMP in-game to be developed and more complete instantly. Except, to the launch, some of them don't really work - the head and the head snaking clothes and the snake are designed to be, you know, coversalls in fury, but they don't seem to muffle. No word from Konami again. Eva and the garments of the garment can be worn with their open or closed clothes, with Konami that note that "the area of the chest can be decompressed for a tactical advantage". That is fine! Junk, but not a surprise. What has my dander up is the strange tone-sorde. The boss just explains the dress of him stealthily at the culmination of the snake eater while he explains how he gave up the body of him and his child for the village of him, revealing a scar of Snaking from a cesarean battlefield, and She will now give everything she has left - her life. It is a powerful moment and the snake struggling with its guilt and frustration, then killing its sparks... everything else that happens in metal games. But yes, of course, now you can stand on the battlefield as a female soldier with his decompressed dress to show a false scar. Maybe.thought to be a tribute to a loved one, but Grudy turns out. Yes, the "tactical advantage" is crude, but this is already a game where you can wear a cardboard box glued with pictures of pin-up patterns and the male soldiers will crowd around Cooing so it's not barely trouble-free from Icky. In other ghost pain news, an update scheduled for November will add a grade 8 tranquilizer gun as a sub-angle attachment for other guns, a "stealth mode" for FOB invasions, and new security features for FOBs. One of the new women's DLC dresses in Solid Gear Gear Solid 5 can be "powered for a tactical advantage" in the game, according to its description. The suit, which was originally worn by Eva Metal Gear Solid 3 Eva, is available for 79p and can only be worn by female staff. But as detailed by the Xbox store, it's 6 - "The chest area can be decompressed for a tactical advantage." The image accompanying the DLC (above) shows the outfit decompressed just below the character's naval. Two other seeds 6 - "The Boss Sneaking Suit and Suit Sneaking Suit by Snake - Comes with gameplay advantages that prevent 6 -" your body body detected by enemies equipped NVC" during FOB missions. Metal cabinet Gear Solid 3 tuxedos, fatigue and two new suits for D-Horse can also be purchased for 79p each. The DLC suit follows controversy on the dress worn by the quiet lead female character, which has been criticized for being excessively revealing. Konami also introduced new forms of microtrasulation to Metal Gear Solid 5 earlier today allowing players to pull insurance on their FOB and accelerate development on new platforms. The metal gear in multiplayer mode based on the team of the game arrived today on the console, with a release version of the PC to follow in January. Source: xbox.com xbox.com
