Washington, Today, the Consumer Financial Protection Bureau (CFPB) issued guidance on two waste collection practices that are likely unfair and illegal under current law. The first, sudden overdraft fee, involves an overdraft fee that is charged when the consumer has enough funds in their account to cover the overdraft fee, if the bank allows it. The second is the practice of indiscriminately charging anyone who deposits an unreturned check a deposit fee. The fine comes as a shock to depositors who thought they were raising their money. Americans are willing to pay for competitively priced legitimate services but are frustrated when they have to pay unnecessary fees for unexpected or unwanted services that have no value to them," said CFPB Director Rohit Chopra. "We provide guidance on applicable law to help law-abiding businesses compete fairly and the families they serve." Overdraft and custody fees are likely to violate the Consumer Financial Protection Act's prohibition on unfair practices if consumers do not reasonably pay them can avoid. Today's Consumer Financial Protection Circular on Surprise Overdraft Fees and the CFPB Compliance Bulletin on Surprise Depositor Fees detail when penalties imposed by financial institutions may violate the law. Banks sometimes charge the depositor a rejection fee, usually between \$10 and \$19. However, the person attempting to cash the check does not know or has no control over whether the check will be cleared, and sometimes such a person is a victim of check fraud. In fact, there are many reasons why deposited checks can be rejected, and the most common reason is that the check sender's account does not have sufficient funds. Collecting a commission from the payer penalizes the person who could not have foreseen that the check would not be returned and does not stop the payer from writing counterfeit checks. This is explained in the newsletterCharging such fees from depositors, regardless of the circumstances, may constitute a violation of the Consumer Financial Protection Act. Financial institutions can generally comply with the law by applying tailored fee policies that charge depositors a fee only in situations where the depositor could have avoided the fee, such as B. if the depositor repeatedly submits bad checks from the same issuer. Overdraft Fee An overdraft fee may become a surprise fee when the customer does not reasonably expect their actions to be subject to an overdraft fee. For example, even if an individual carefully monitors their account balances and carefully manages their spending to avoid overdraft fees, they can be easily penalized when financial institutions use processes that are incomprehensible or vulnerable to manipulation. Today's Consumer Financial Protection Circular explains that institutions charging unexpected overdraft fees of up to \$36 may be breaking the law. The circular lists some examples of potentially illegal overdraft charges, including charging a penalty for purchases with a positive balance. These overdraft fees accrue when the bank proves that the customer has sufficient funds to make a debit card purchase at the time of the transaction, but the consumer is later billed an overdraft fee. A financial institution often relies on complex back-office procedures to justify charging a fee. For example, after a bank authorizes a debit card transaction with sufficient funds in the account, it charges that transaction due to subsequent disruptive transactions. In September 2022, the CFPB took action against Regions Bank for charging unexpected overdraft fees, known as authorized positive charges. As early as 2015, the CFPB, along with other federal regulators, including the Federal Reserve System, began warning financial institutions against charging certain types of permissible positive fees, such as assues the region to illegally punish customers. Among other things, regions must refund consumers all incorrectly billed funds since August 2018 and pay a \$50 million fine. Today's Consumer Financial Protection Circular on Surprise Overdraft Fees and its Newsletter on Surprise Deposit Fees coincides with the latest announcements as part of the CFPB's Unwanted Fees Initiative, one of the federal government's many efforts to increase competition and reduce unnecessary financial burdens on American families . Junk Duty Initiative Garbage levies cost Americans billions of dollars. Tens of thousands of people responded to the CFPB's request for information with their stories and complaints about unnecessary bank charges. Since then, the CFPB has taken steps to reduce pay-to-pay fees and announced a delayed process to rule credit card fees. Over the past year, the CFPB has also published several research reports on overdraft fees and analysis of college banking products. Earlier this year, several banks announced they were eliminating overdraft fees or updating their policies to be more consumer-friendly. In recent months, several major banks have announced that they are removing underfunding fees from their current accounts. The CFPB estimates these changes will save consumers \$3 billion. Please review today's consumer financial protection circular. Unexpected overdraft fee assessment practices. Read today's Compliance Bulletin. Read the recent CFPB enforcement action against Regions Bank for charging unexpected overdraft fees. Learn more about the CFPB's work on junk fees at consumerfinance.gov/junkfees. Consumers may file complaints about overdraft and deposit fees as well as other financial products or serviceson the CFPB website or by calling (855) 411-CFPB (2372). We encourage employees who believe their companies have violated federal consumer protection laws to submit information to whistleblower@cfpb.gov. whistleblower@cfpb.gov.
