The device is not the first attempt to marry an Android smartphone to a point and shoot, but is CM1 better? We found out about this.Quick! The easiest way to describe the LUMIX CM1 is an Android smartphone at the front and a point and shoot at the back. Panasonic refers to him as a camera primarily, but we would be forgiven to think it's just another AndroidLooking at your forehead, which is full screen. Integrating a camera in an intelligent phone means that size and weight are much more than the average. The CM1 is 21.1 millimeters thick (about three times the size of an Xperia Z3, for example) and weighs 204 grams, but that is not bad for what the device offers. Square corners, metal sides and textured plastic cover are quite typical for knitted and shooting chambers. The large lens module is surrounded by a disassembled ring, and it collapses, but it is not enough for the device to be difficult to sustain or difficult to slide in a jeans pocket. The telephone specifications include an excellent 4.7-inch Full HD panel (465-PPI), a Snapdragon 801, 2 GB processor, 16 GB of internal storage, microSD slot and a battery of 2,600-mAh. The device runs a stock version of Android 4.4.4, which will give you the typical user experience of Smartphone Kitkat. The camera on the front is an average of 1.1mp, but, of course, the rear handle is anything less average. The Lumix CM1 has a large 1-inch sensor with 20 MP resolution, Leica optics with a lens f / 2.8, OIS and a LED flash. There is no optical zoom unfortunately, probably to keep the size below. This is not a DSLR replacement for any means, but the specifications must be sufficient in many situations, at after all, the best camera application in the Lumix CM1 emulates the controls of a Panasonic point and solution, and anyone who is familiar with Lumix products will feel at home. There is the usual current of controls, for things like the exhibition and opening, in addition to many automatic modes for those times that you just want to take a fast shot. The ground ces no Place to try a camera, but with the Lumix CM1 leading the states, we hope we have the opportunity to take the Panasonic camera phone for a shooting soon.
