HTML Moet In Hoofdletters Blijven.

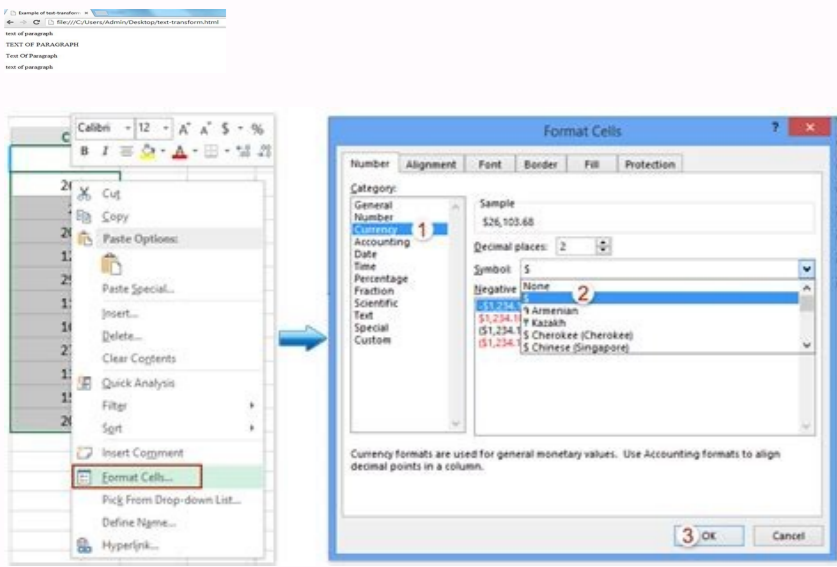

## The User Experience (UX) Of CSS Text-Transform

Name: SARAH CONNOR

```
<html>
<head>...</head>
<body>
  <h1>The User Experience (UX) Of CSS Text-Transform On Form Input Fields</h1>
  <form>
    <label>Name:</label>
    <input type="text">
      <#shadow-root (user-agent)>
        <div id="inner-editor">Sarah Connor</div>
      </input>
    </form>
  </body>
</html>
```

When you apply a CSS text-transform to a form input field, you are creating an unnatural divergence between what the user entered and what the user sees. Such a divergence causes confusion and frustration.

Html text-transform capitalize.

Other characters remain unchanged (they retain their original case as written in the element's text). lowercase is a keyword that converts all characters to lowercase. The capitalize line in the browser compatibility table contains the version the different engines started to support this now precisely-defined behavior. If you do use the right tags, only the content will display on a web browser. HTML Essentials Because tags are essentially the key to writing proper HTML code, it's important to understand how they work before you attempt to build a website from scratch. In Greek (el), vowels lose their accent when the whole word is in uppercase (À~Á/ÁÁ), except for the disjunctive eta (À@Á/ÁÁ). When applying text-transform: lowercase to an uppercase sigma (ÁÉÁ), the browser needs to choose the right lowercase form based on context. For example, if you write HTML background color code specifying that your site should have a blue background, browsers read the code you've written and follow those instructions. ÁÁ is used only when sigma terminates a word. text-transform: none; text-transform: capitalize; text-transform: uppercase; text-transform: lowercase; text-transform: full-width; text-transform: full-size-kana; text-transform: inherit; text-transform: initial; text-transform: revert; text-transform: unset; capitalize is a keyword that converts the first letter of each word to uppercase. Also, diphthongs with an accent on the first vowel lose the accent and gain a dieresis on the second vowel (À~ÁÁ/ÁÁÁÁ). You can build a simple website with HTML alone, including different font sizes and types, paragraphs, photos, background colors and other basic features. There are two tags, opening and closing, that must always bookend your content. The language is defined by the lang HTML attribute or the xml:lang XML attribute: none | capitalize | uppercase | lowercase | full-width | full-size-kana | initial String decio(v metukad htiw rettel a, sretcarahc anakatak htdiw-lluf raluger eklnU, metnoc dna sptat fo tssnoc stnemelE .JhsllgnE ni selcitra gnippiks sa heusc( snoitnevnoc gniscac elit cificeps-egaugnal wollof ot ezilatipac tcepxe ton dluohs srohtuA .etON ybur rof ytilbigel evorpmi pleh nac osla U, derongi era slobmys laitni woh setartsnomed silt ) ;thgir :taolf { gnorts } .ezilatipac :mrofsnart-txet { naps >p/< >gnorts/naps/napsgnorts< ezilatipac :mrofsnart-txet>p< >p/< >gnorts/gnorts< gnirtS laitinI>pgnorts< gnirtS laitinI>pp/< >gnorts/naps/napsnorts< ezilatipac :mrofsnart-txet>p< >p/< >gnorts/naps/napsnorts< enon :mrofsnart-txet>p< >p/< >gnorts/p/< >gnorts/naps/"ln"=gnal napsnorts< ezilatipac :mrofsnart-txet>p< >p/< >gnorts/"ln"=gnal gnorts< gnirtS laitinI>pybur< arap odasu etnemlareG anak ezis-lluf .I/±ÁÁ e \*ÁÁ/i :sosac ed serap siod e ,otnop o mes e moc ,i ed sopit siod ;Áh ,)ab( rikhsaB e )t( oratr;ÁT agloV ,)hrc( aiemirC ad oratr;ÁT ,)za( onajabrezA ,)rt( ocruT omoc ,sociqrÁt samoidi mE .omoc siat ,amoidi od socifácepse sosac ed otremaepam ed sargar sa atnoc me avel ofÁÁamrofsnart-otxet edadeirporp A .stib 8 ed seretcarac ed sogidÁc me anakatak ratneserper arap odasu iof arugral aiem ed sÁAnopaj anakatak O ) ;thgir :taolf ;%001 .htdiw { gnorts } ;htdiw-lluf :mrofsnart-txet { naps >p/< >gnorts/naps/napsetrof< htdiw-lluf :mrofsnart-txet>p>p/< >gnorts/etrof< gnirtS laitinI>p
