The Internet Movie Database has not only information about movies and programs, but also free movies you can watch right now. Almost every search engine will point to you if you are looking for a movie plot or if you are trying to find out who was in a movie you just saw or who is going to be in an upcoming TV show. If you've ever searched for a movie or actor, you've probably landed on IMDb. The site is really a mammoth depository of movie information, and while it's great that most of it is completely free to access, it can seem cluttered and difficult to navigate. Movie Genres: Browse IMDb by genre to find horror movies, comedies, animations, thrillers, crime shows, and more. It offers an extensive database of movies, TV shows and cast information. You can also build your own private or public watch lists. You may need to choose one method over another if you are looking for a new movie to watch or if you only have one or two bits of information to start the search, such as an actor's name or plot information. This price is for if you pay for a year up front (\$149.99), or you can opt for the slightly more expensive monthly subscription for \$19.99. IMDb Name Search: Find titles by an actor's name, birthday or birthplace, star sign, date or place of death, gender, filmography, group of names (such as a winner or best director), and more. Most pages associated with a movie or TV show on IMDb offer several features, including a plot synopsis, plot summary, storyline, cast information, reviews, tagged genres, images, videos, nominations, similar titles, box office details, running time, trivias, FAQs, user reviews, and more. A [n](#) 1990-2022 by IMDb.com, Inc. AIA © m for background information, the Internet Film Database also offers unique features of characters such as biographies and quotes/quotations memorable, such as the ability to ,keep eht fo seivom
