Does this evaluation be useful? (2) (2) Respond Best Phone With Maixa Can Make Vivek R. (25 November 2019) At Amazon I purchased this iphone 8 gray space of 64 GB in December 2017. I picked up 57k. I saw the price now fell to 36k, so I thought I would write a review on it for almost 2 years of use. Well, I have this phone when iPhone X was just introduced but as it was very expensive, so I went along with the iPhone 8 and I have not been disappointed with my choice. The phone is working in the best way as it has just been bought yesterday. Neither a single from I already have any software problems, lag problems, conscious problems .. nothing at all. It has been a soft experience until now and I look forward to using it for another 3 years more. Asince I'm interested in street photography The camera works pretty good for me. Though glass back feels very slippery and it's really, but since I always use a back cover so it was not a problem for me. I do not have it used for much of the games so I never faced any heating problem, but I have it used by an extended period of time and I did not feel anything discomfort one that people type Neglecting on the iPhone is the headphones provided with the headphones phone.The are very good quality and therefore should not be taken as guaranteed. In fact the microphone is quite impressive to record your music or your music. It is very sensitive and can record up to even a whisper. I use MacBook Air so that the interaction with my laptop has been very good. After all, I do not regret it to buy it. As the prices dropped a lot now then if somebody else wants to get a perfect phone size frame I would recommend iPhone 8. Let me know if there is any specific duct on the subject. Does this evaluation be useful? (19) (3) Reply Rahul Tanwar (January 2, 2020) in Flipkart Superb Mobile All Fautre This comment is useful? (3) Reply Sumit K. We are continuing to see a flurry of rumors about not just the iPhone 13 and Apple Watch Series 7 that we are waiting to see at the event, but also the iPhone 14 that is a whole year. The other great news this week was that a decision was finally transmitted in the blockbuster epic games v. Apple's judgment. It was a mixed verdict with Apple winning in nine of ten counts, but the only victory is pica that means that US developers could bind to alternative payment systems in their applications. But stay tuned, because this dispute still does not end. 'California Streaming' Apple Event announced for September 14: Here's what to expect it to be official! Apple announced that its next event will happen on Tuesday, September 14 to 10 in the morning, with a video flow to be available on the Apple website and YouTube. Apple is widely expected to reveal iPhone 13 and Apple Watch Series 7 at the event and third generation airpods can also be announced, so make sure to check our general vision than wait. Hardware, also Apple is likely to share the dates of iOS 15, iPados 15, Watchos 8 and Tyos 15 during or immediately after the event. Games is peaks vs. Apple judgment allows application developers linking the alternative method of payment a decision was reached this week in the games is high profile v. Apple's judgment, with Judge District Yvonne Gonzalez Rogers that Apple's anti-direction conduct is anti-competitive and decision in favor of Apple in all other counts. The decision of Rogers would allow US developers to link alternative payment systems instead of being limited to the Apple application shopping system, but the dispute is not in any way, as peak said that Plans to appeal at least some decision-making issues that was in favor of Apple while Apple is still considering their next steps. Details of the iphone 13 leak, Apple Watch Series 7, and AirPods 3 rumors Only days ahead of the Apple event, the rumors of the last hour have emerged on the iPhone 13, Apple Watch Series 7 and third-generation airpods , and we see all the details rounded here. Another rumor that resurfaced this week states that iPhone 13 Pro and iPhone 13 models will be available in new black and bronze color options, replacing current graphite and pacific finishes. Also we could see a new pink color for iPhone 13 and iPhone 13 mini. iPhone 14 rumors that would have no notch, in the bump camera, titanium project, and more return on march, analyst Ming-chi Kuo stated that at least some iPhone 14 models go leave the notch in favor of a camera front punch and Leaker Jon Prosser reiterated this rumor. Prosser also stated that the iPhone 14 Pro Max will have a thicker chassis eliminating the rear camera collision, a titanium table, the round volume buttons, the redesigned speaker and the Microphone grills and a reliable connector. The iPhone 14 Pro models will probably present the face identification below the display for facilitating the notch removal. Ross Young Display Industry Analyst said Apple plans to move the sensors of face identification under the exhibition on the iPhone 14 Pro models, although he has said that the resource does not finally have So the plans could change. Young people said that it is "easier" for Apple to incorporate the face identification sensors under the exhibition of hiding the front camera under the screen, which would explain why some models iPhone 14 are round To present a front perforation camera. Apple Watch Series 7: Rumors, resources and more with Apple Watch Series 7 expected to be announced in the next week, now and it is a great moment to achieve everything we hear about the device. Apple Watch Series 7 models are supposed to be available in limited quantities in launching, probably due to shortage of contained supply chain components and manufacturing challenges that have emerged from the new design of SA © Rie 7 with sizes exhibition larger and a flat display box. These challenges have been addressed, therefore, we hope, any delays or scarcity will be short. Macrumors Newsletter Each week, we publish an email newsletter like this, highlighting Apple's main stories, making it a great way to recover the recapitulation of the week beating at all major themes we cover and Tying related stories for a large figure vision. So, if you want to have the main stories like the recapitulado above hand your e-mail box every week, sign up for our newsletter! Show more devalued by iPhone If 2020 we built around a goal: launch a new iPhone for less money than ever, and that's fine. For only \$ 399 / £ 399 / AU \$ 679 You can have a new apple device - AÀ Af © One of the best iPhones already created and you can choose one for less than half of the price of a new car -Che phone. The phone design will be familiar to anyone who used an iPhone recently - unless you have not maintained an Apple device since 2013, you will have seen this frame of 4.7 inches before, complete with top bezels and a lower and a home button with a digital impressions scanner built in This is the newest apple smartphone - this is esÀ © iPhone 12, including this phone, iPhone 12 mini, iPhone 12 and iPhone 12 pro maximum. You can find comments for each of them by clicking on the linked names, but they are all the most expensive and more premium devices than the SE. Soon, we will have the iPhone 13 models to consider when they arrive in September or October, but none of them are expected to be as accessible as the iPhone if 2020), so it will still be the cheapest modern iPhone that You can buy.The iPhone if 2020) is seen as the iPhone form factor "Smaller" given the screen designs all the latest models, and it is lighter and pocket than any other modern Apple phone © MO iPhone 12 Mini, which is marginally smaller (although packing on a larger screen), but also more expensive than a telephone range. It is pleasantly resistant to water, but has some disadvantages: missing a headset at the bottom, and because the display technology is slightly dated (as it comes from the iPhone 8) can suffer in bright light when you are trying to watch video or like.apple You may have arrested with the same design as the iPhone 8, but the guts are very improved - notably the new chips ET biemine A13 inside, which adds speed almost everywhere and really improves performance on the models of 4.7 inches older. It is not on the level of the iPhone 12 level, but it is not far - and receiving the recent silence means that the iPhone has been years of eods updated the head. Speaking of updates, the iPhone can now run iOS 14, and is confirmed to get iOS 15 when this is later thrown in 2021 (Crédito Image: Techradar) that the A13 chipset improved as well © Mo Performance Performance, although no discernable changes in the sensor specifications from the iPhone 8 (there is only one single lens on the iPhone If 2020). It takes decent and bright photos that can please most people, although it does not offer the same color or clarity reproduction as the iPhone 11 Pro Max, for example, much less iPhone 12 Pro mode Portrait mode does not work as well as on phones that pack a second depth sensor sensor for precise bokeh effects, and as a result you can be left with some looking fringing the borders of the subjects. But overall the camera - and especially for the price - it takes stunning photos, most scenarios.battery life is probably one of the biggest questions we find with iPhone if 2020 - will not easily last one day and sedated user. Given the number of Power-Hungry Applications available that will take advantage of all this power provided by Chipset A13, we would like to have seen at least one battery all day, even for the lower price. Do not let it hurt the fact that the iPhone se 2020 follows from your predecessor, bringing you a new iPhone, without a lot of commitment, for less money than you can expect. While you do not reach many heights in terms of power or performance, more than compensates for that, being the cheapest apple of the iPhone, has already launched while packing refined and useful hardware, making the new iPhone if an explanation option for those in a budget Or just wanting to find an easy route for Apple's ecosystem. The cheapest iPhone ever at \$ 399 / Agua, à € 399 / AU \$ 679New iPhone Seven Date Date It was April 24, 2020 easily available now in the USA, UK and Australia iPhone is Available now all over the world, including the US, UK and Australia. The date of launching was April 24, 2020, with localomends going live the previous week. Although it has been called to be called iPhone if 2, the iPhone is the official name that Apple opted for his device 2020. You will not see you referred to as the iPhone if 2020 on the Apple website - this à © our way to distinguish it from the 2016 device. iPhone price is starting at \$ 399 / £ 399 / AU \$ 679, which is a small drop of price in some regions of the Your spare price of \$ 399 / £ 419 / AU \$ 749 / RS 42,500. The base model comes with 64 GB storage, with 128 GB and 256GB models also available for a higher price. The 128 GB model costs US \$ 449 / £ 449 / AU \$ 759 while the 256GB It costs \$ 549 / £ 549 / AU \$ 929.in, Apple is offering the new iPhone if at \$ 16.62 / MA\$ through your financing plan or, if you have an older iPhone for Negotiate, you can obtain you for less. Check out the best iPhone deals (crédos de picture: Techradar) Design and very familiar blanket (Read: Old) DesignRetine HD display is good, if a small darkiPhone if 2020 comes in black, white and redhead iPhone If you have exactly the same design and display as the iPhone 8, 2017, Using this form factor and export a movie down to a smaller size, the iPhone SE 2020 manages the more rapid task. If you will charge the phone to its limits, Enta E o the iPhone devices 11 sÀ E o better able to handle graphically intense tasks and applications - but even when playing the most powerful games like PascaÀ € s Wager, we will didnÀ E feel the new iPhone SE performance. The usuÀrio mã © dio notaraÀ little difference unless intentionally is trying to tax the SE 2020.Of Course, the newest iPhone 12 range has beaten everything that you are doing, thanks to a chipset biÀnico even younger A14, but the iPhone is it is not far behind, what is interesting is the way the iPhone was "angular" by Apple in terms of energy production. Our ours The test showed that the newest iPhone in the £ has the grant or raw speed of the iPhone 11 range, suggesting that Apple estÀ balancing the output power with the battery performance. The benchmark pontuaÀšjes saw a NA°cleo A°nico almost idÀ°ntico (for low-impact tasks) the punctuation E 1300 for the iPhone and SE 3100 for multi-core test. This À © 3500 less than the range for the iPhone Pro 11, but in the far E iPhone Padra E 11.Todos the benchmarks we run painted a similar picture, showing that the iPhone SE 2020 in the E has the raw grunt the Pro range, perhaps designed to provide the E duraÀŠA more powerful battery (diam said © image: TechRadar) You can see the same thing in 11 iPhone vs iPhone Pro 11 - small Differences in benchmark results, probably in an attempt to ensure that each Experience À © adapted to different. UsaÀrios target. À © interested in model Pro vain E wanting the absolute mA°ximo power (and À © so that there are a larger battery to compensate), but the usuÀrio more "regular" may be well with another equiÀbrio - the new iPhone to Tamba © m has 3GB of RAM instead of the 4GB iPhone and iPhone 11 12 is E the packaging probably again to minimize costs. We will experience very little in desacceleraÀŠA so the E during our time with the new iPhone is À € à ~ "wing © m of cÀ € mera, where phone took a second or two to process each image that we will Cook, this on the À € a major problem in the grand scheme of things, but if you want to immediately check a snap you took, takes the shine a bit. À difficult to know what else to say about the updated chipset (which will have an impact the performance of some applications in the future), but based on comparaÀšjes side by side in the E quickly post-Amos the power of the new iPhone cheaper: the iPhone is has launched with iOS 13.4 by default: the E but received inÀmeras atualizaÀ since then the E sÀjes, including a key for iOS 14 - with the latest version E Available for the phone at the time of the iOS redtaÀŠA E 14.4 (Image © CRÀ said: TechRadar) A°nico Sensor. cÀ € moral2MP. imbudaU with avanÀšado image processing photos, but E o market leader leader of the recording E of vÀdeo OPÀšjes in our visa E o, the make-or-break feature for the iPhone is À € à ~ "and Enta E o key focus of this revision the E À € à ~" À © cÀ € to mere iPhone and Wed À! Performs well in daily use - Since there are hardware "Ooid" on offer here, Apple ha S DÀª a bet that can improve the picture quality using the image processing chipset powered by BIA°nico A13.Spoiler alert: the bet paid handsomely. The new iPhone can resist the iPhone 11 Pro Max in terms of agtiaÀŠA E general, and only struggles when it comes to Àreas where hardware estÀ missing. We will explain more about this in a moment, but we will "already in the iPhone Interface E E SE 2020 for iPhone 11 Pro Max, iPhone XS Max 8 Plus and iPhone, and has its prÀprio well.Before to enter into more detail about the cameraÀ s performance, look Latvian € s in hardware: the cÀ € mera iPhone SE estÀ basically using the same set of lenses and megapixel count, like the iPhone 8 with a camera of mere € . 12MP, the lens of six elements and a sapphire glass cover forÀša us at À E know it the exact sensor estÀ being used - Apple in À E confirmed it had improved the hardware IÀ - but the same cÀ € mere of 12mm and aperture F / 1.8 remains, so it seems that there are very little mudanÀša for - however sensor, Apple kept the same hardware specs for the lens A € angle "inormal" in the range of the iPhone since the iPhone 8 but impelamente Impro the quality of the pictures "which suggests that the processorÀ doing very heavy lifting. Enta E o, how much difference imbuing the iPhone with the same chipset biÀnico A13, complete with this image signal processor improved in. do? The short answer À © : a lot. photos put the iPhone in 2020 SE next snaps taken with the iPhone Plus 8, for example, and you to instantly see a better sharpness, more accurate color reproduction, and a photo in general a Bettera became or darker conditions.appleÀ € s À € tuning € tuning images of the new iPhone if one the way you find a photo should look at one is interesting, with processing appear to follow the steps from in the iPhone 11 range, favoring a Scene.Image colder 1 of 9 (image criterion: techradar) image 2 (image crédito: techradar) image 3 of 9 (image criterion: techradar) 4 of 9 (cris Image: Techradar) Image 5 of 9 (image criterion: Techradar) Image 6 (image crédito: Techradar) Image 7 of 9 (image criterion: Techradar) Image 8 of 9 Image: Techradar) Image 9 (Image criterion: Techradar) This results in images that seem less to warm up in comparison with those of the same iPhone XS from 2018 (which, in Our eyes, they are more visually attractive), but processing makes snaps produce with good levels of sharpness and clarity in a side comparison side with the iPhone 11 Pro Max, the most app phone number 16 has already created full of features, the iPhone if it does not run as wella | But thatÀ € ~ "s understandable for the price. It is clear that it has a tendency for superexposition in some scenarios, with some of the colors and liveliness lost in some pictures.One in particular saw us having massively fall to exposure of a scene of nature taken under forest cover. Despite the darker conditions, the image was very bright as it looked like the new iPhone camera if it was trying very hard to compensate. We often find that the images on the display were much brighter than in real life, which generally meant that we had to adjust the exposure.However, in a direct comparison with the best iPhone on the market, there was WasnÀ € T as much of a difference such as huge abyss in terms of price could suggest. You do not do things as night mode (which is excellent, and it's worth looking at you? I'm considering the iPhone 11) or the additional ultra-wide and 2x zoom cameras.in of the image quality that you Getting, the differences are small, but still there are to see. Not all tricks have to get out of one, for example, the depth of the field capabilities on the iPhone if it is strong (due to the lack of a depth-sensing lens). This means a portrait mode doesnÀ € t Always work well the edges of the subject (and only manages to use the blur background in humans, not on objects). The new iPhone camera will blur around the edges of a subject, sometimes, or Whether, using one of the smart effects, such as mono stage light, look quite strange, with pieces of hair missing on the sides. Italy It is not terrible, but Italy is easy to get the intelligent of Apple's Snaps Apple uses in your marketing. Image 1 of 2 iPhone Sample CA € Mera If - the overall brightness is contained (Image Credit: Techradar) iPhone 11 pro sample max - The statue becomes the main focus (Thanks to a better glow (Image criteria: Techradar) Although any Phone that can algorithmically elaborate a guy using the Smarts Machine alone is impressive, there-€ Gulf SA between a photo portrait portrait taken with a telephone with-two cans in comparison with a single sensor. Elsewhere, the low light detail is not robust, and color reproduction is behind this Behemotico iPhone 11 Pro Maxbut when you consider the relative cost of the phones, and the fact that the new iPhone if about a tonight of the 11 Pro Max. Ita is easy to forgive some of these light deficiencies and instead of getting impressive of what Apple has managed to improve things so well just putting a new engine inside what is, in many ways, an old handset.image 1 sample 14iPhone if - colors seem a little silenced (credited Image: Techradar) Picture 2 of 14iPhone 11 Pro Max sample - much more vibration (image criterion: TechRadar) 14iPhone sample image - A clear, colorful image in the crepness (image criterion: Techradar) 4 of 14iPhone 11 pro sample max - more wealthy colors although (Image criteria: techradar) 14iPhone sample image 5 Rvore is right has some lost lost (Picture Criteria: Techradar) Image 6 of 14iPhone 11 Pro Max Sample - Pro Max shows more sharpness (image criteria: Techradar) 14iPhone image 7 Sample - Great colors and angles sharply in focus ( Image Subjects: Techradar) Picture 8 of 14Phone 11 Pro Max Sample - For some reason, Pro Blew Through the darkest, richer colors (image criteria: Techradar) 14iPhone image 9 A Good Landscape, Strong (Image Saying: Techradar) Picture 10 of 14Phone 11 Pro Max Sample - Just a small amount of improvement in shadows (Image criteria: Techradar) 14iPhone picture 11 Sample - Shadows Lose Detail touch (Image criteria: Techradar) 14iPhone 11 image 11 Pro Max Sample - Pro Max Manages to Improve Shadow Problems (Image Criteria: Techradar) 14IPHONE Image If samples - no The is too much to choose between the two here (image criterion: Techradar) 14iPhone 11 Pro Max Sample - The Effect Noir is strong in both (image crédito: Techradar) The front camera, a case of 7mp, has AL This was given Smarter Capacities. You are able to take the images of the above mentioned picture mode Which means that the background falls out of the world and you can arrest the world only with your stunning features. There are not À € s À € ~" À € à € ~" (Read: Veho de Vão Solfie de Mo Slow Mera) Here, and we can not say we miss - though This may be just because we are still slightly nauseated by the invention of the word "Slofie". The quality of the images are good - they are sharp and clean, and even seem decent in little light too. Apple applied its photo algorithms well here, and improved the capacity of the camera facing forward to take soft and well-lit photos. again, using any of the options of the portrait mode, mainly leads to an image of Close, with the hair looking for a little unnatural or blurred - but the standing selfies go well. In terms of video also, the overall power of iPhone if 2020 is as much as anything Apple is offering elsewhere in its line: you can shoot at 4k video in until 60 frames per second ( Fps). The option of 60fps should only be used in good light, as movies will be dark in smaller light. The liquidity of the filming looks a bit strange - it is almost very slippery - but it gives a better appearance for fast movement scenes.Image 1 of 6 miles fringes around the hair. Verdict: No. (CRÀ % said: Techradar) Image 2 of 6good outdoor ability to find the subject. Verdict: hot. (Criteration Image: Techradar) Image 3 of 6 The mono effect of high key light looks ok, if a bit sharp. Verdict: No. (Image criterion: Techradar) Image 4 of 6the Stage Light Mono effect often worked better. Verdict: hot. Image: Techradar) Image 5 of 6Lamplight and the Basic Portrait Mode is good, but again the hair is lost. Verdict: hot. Image: Techradar) Image 6 of 6Hair Once a problem, the subject is impressive. Verdict: Very hot. (Image criterion: Techradar) Life battery battery is just about a viable that the new chipset does not make things more efficient fast and wireless things can help offset the lower capacity Battery size of the new iPhone if it was not announced by Apple (never reveals this specification), but we know that the iPhone 8 came with an energy package of 1.821mah, and we anticipated something similar to the iPhone if 2020.And, if it's really the case, then it's a potential problem, because the iPhone 8 had the stellar life of the battery À € à € ~" could only about a day in normal use, with the charger that needs to be within reach at the end of the night. The new iPhone should, in theory, have more time battery as it is a more efficient engine in your heart, and iOS 13.4 is better in managing energy consumption. However, Apple says that iPhone if À € à € ~" baws about the same as the iPhone 8, which is surprising and suggests that you should see about 2-4 hours less the useful battery life in normal use than an iPhone 11 until 25 hours less, if only using the iPhone for audio.in practical use, we saw a mixed performance of the new iPhone in Of Duration of the Battery: It certainly was not in the same power support as the impressive iPhone XR and iPhone 11, and we find ourselves having to arrive regularly for the charger at night. However, on low-use days, where we do not use the iPhone for a large amount of photography or navigation on the web, we arrived at the end of the day with more than 30% to the left in the tank, and we saw Little drainage of power during the night also, suggesting the iPhone if it is quite efficient waiting in standby mode. You will have about 5% performance drain overnight, depending on which devices you linked via Bluetooth (we had two linked wearables, which caused more than one fall. But, in general, we feel that the iPhone was fact a kick for the older models, 4.7 inches, where it just seemed that the power package inside was not large enough for À € ~ À € ~ We had the confidence in this device that we see to enjoy with more recent iPhones. (Image criterion: Techradar) however, if you are coming from an original iPhone or older iPhone model that you do not You notice any problem (and you will probably see a slight improvement) - It's just a pity that this looks like an opportunity to improve things that Apple surprises surprisingly. One way to relieve this question is to invest in a fast charger. Anything with USB-C or 18W power delivery (CO Mo the charger that comes in the box with the iPhone 11 Pro and is available for an extra of \$ 29 / £ 29 / AU \$ 49) will charge the phone quickly "nos" A "€ À "€ Empty for more than 50% in about 30 minutes. The general charging speed is about an hour and 50 minutes for a complete recharge, killed 100%, but the charger 5W that comes in the box will be much more slow. We suggest picking up an Apple or Anker iPhone charger to meet your fastest loading needs. So you can buy a wireless charger, as the iPhone if 2020 is enabled for qi. Take a cheap or two wireless cushion, home and when (eventually) at work, and you will never have a problem with the levels of power again. It is not ideal - us, instead, the iPhone could only easily last one day without you need to reach the charger, giving you some breath room going to the next day or in case of emergency, but it is not the case here for some reason. The best iPhone loader: cables and cables and cables Rapid loading loads Do you need to buy iPhone if? Image: Techradar) Buy Se ... You want a new, great iPhone is easily the best value of Apple's best. It is not only the cheapest model, but comes with the touch ID, a powerful engine that makes it fast and responsive under the finger, and a decent camera, all for almost half of the price an iPhone 11. You will stay for a few years the iPhone if from 2016 was popular because it offered something new at the moment: a new iPhone for less money than existing models, and this same idea was offered with the latest model. With the iPhone if 2020, you are likely to still get updates and security features for three to four years, which will appeal to many who do not bother to have the most recent resources. You want a light device if you want a new iPhone, but do not want the weight in your pocket, then this (or the iPhone 12 mini) is the model to go. It is much less heavy (partly, it seems, due to having fewer battery to support), and it is easier to wrap your fingers than some models in the range now. Do not buy it if - You want the best photos of an iPhone while the iPhone Cámera If 2020 is strong, it's not the strongest in the range, and that fought in some areas , as with the level exposition and depth of field effects. However, it is still powerfully impressive for the money, and goes Those who are updating much older phones. You value the battery life that we are not yet sure because Apple got the duration of the iPhone 8 battery, but it has. Af © © But since the latest models are now capable of much more easily lasting a day in normal use, we waited more here "this is very" iPhone battery life ". You like to watch movies at GO The screen on iPhone if 2020 date back a few years, being the same as it was used on the iPhone 8. It is not stellar in bright light, and lacks the sharpness of more recent screens, although speakers are pierced to help improve The experience of movie observation.
